

**IMPORTANT**  
 The Icefields Parkway (Highway 93N) traverses high elevation (2,088 m/6,850 ft) mountain terrain. In the winter, there are special considerations for driving this road including the absence of services. Snow tires are required November 1 to March 31 or any other period during which the highway is covered with snow or ice. Winter and summer guides can help you plan a safe trip. A park pass is required.

**Camping**
